ANNUAL REPORT on the STATISTICS OF LABOR for the Year Ending November 30, 1937

DEPARTMENT OF LABOR AND INDUSTRIES

THIRTY-SIXTH ANNUAL

Directory of Labor Organizations in Massachusetts, 1937

With Statistics of Membership, 1932-1936

INTRODUCTION

The material presented herewith constitutes the Thirty-sixth Annual Directory of Labor Organizations in Massachusetts, the first directory of this character having been published in August, 1902. Labor organizations, within the meaning of this publication. are groups of wage-earners organized for the purpose of bettering conditions of workmen through negotiations with employers, and, to this end, are usually parties to either written or verbal agreements concerning wages and conditions of employment. The number of local unions listed in this issue is 1,402,2 a net increase of 40 over the number listed in the directory of 1936. This gain was largely due to the inclusion in this issue of certain post office clerks unions which previously had not been active as "labor organizations."

The present edition consists of five divisions, as follows:

"National and International Organizations" having one or more affiliated

local unions in the United States (pages 3-7);

"State and District Councils" consisting of organizations composed of delegates from local unions whose members are in trades of a like character within a definite district comprising more than a single city or town (pages 8-12);

"Central Labor Unions and Local Councils" composed of delegates from local

unions in the same locality, not necessarily in similar trades (pages 13-17);

IV. "Local Trade Unions" composed of wage-earners in a single locality directly associated in what may be called the "unit body" of organization (pages 18-72); and

V. "Statistics of Labor Organizations" showing number and membership of local unions at the close of each of the five years, 1932-1936, inclusive (pages 73-77).

At the close of December of each year a general canvass is made for the data which appear in this directory. Each National and International Labor Organization known to be in existence in the United States (see Section I) is requested to furnish the Department with the name and address of its corresponding official and a list of any Massachusetts locals affiliated, together with the names and addresses of certain officials of such local unions. From the State and District Councils (see Section II) and the Central Labor Unions and Local Councils (see Section III) in Massachusetts, somewhat similar data are secured. Each local organization known to be in existence, whether or not chartered by an International or a National organization, is canvassed, and detailed information is secured as to the time and place of meeting, the names and addresses of corresponding and other officials, and other relevant data (see Section IV).

Officials of these organizations from whom no report was received in response to the original request were visited by the statistical investigators of the Division, and the necessary data were secured. There were also ascertained, from various sources. facts with reference to the forming of new unions and the disbanding of those formerly active. At the time of going to press, there were incorporated in this issue such changes in officials, in the time and place of meeting, etc., as had come to the attention of the Department since the original canvass was made. Subsequent changes cannot, of course, be made in this report, but are on record where known. Officials of organizations listed herein are urged to advise the Department of any such changes as they

¹ An edition of this directory has been published each year since 1902, except in 1903, in which year the directory for 1902 was reprinted.

² Total number of organizations listed in this issue is 1,707, of which number 143 are national and international organizations, 72 state and district councils, 90 central labor unions and councils, and 1,402 local

trade unions.

P.D. 15

occur. The Department makes every effort to issue the directory as early in the year as possible, as much of its usefulness depends upon the promptness with which it is issued. In this endeavor we have had the cordial co-operation of the labor officials throughout the State.

ABBREVIATIONS.

Abbreviations for titles of union officials follow: B. A., Business Agent; C. R., Corresponding Representative; C. S., Corresponding Secretary; Ch., Chairman; F. S., Financial Secretary; Gen. Ch., General Chairman; Gen. Sec., General Secretary, Grand Sec., Grand Secretary; Int. Sec., International Secretary; Mgr., Manager; Nat. Sec., National Secretary; Org., Organizer; Pres., President; R. S., Recording Secretary; Sec., Secretary; S. T., Secretary-Treasurer; V. P., Vice-President.

Abbreviations for names of certain national labor organizations follow: A. F. of L., American Federation of Labor; C. I. O., Committee for Industrial Organization; Ind., Independent; S. C. T. E., State, City, and Town Employees; T. W. O. C., Textile Workers Organization Committee (of the C. I. O.); U. M. W., United Mine Workers; U. N. A., United National Association (of Post Office Clerks). In all but these instances the

names of the national organizations are given in full.

Abbreviations for names of railroad companies follow: B. & A. R.R., Boston and Albany Railroad; B. & M. R.R., Boston and Maine Railroad; B., R. B. & L. R.R., Boston, Revere Beach, and Lynn Railroad; and N. H. R.R., New York, New Haven and Hartford Railroad.

Abbreviations for sections of Boston, used in connection with local unions in that city, are shown at the beginning of the listing for that city.

NATIONAL AND INTERNATIONAL ORGANIZATIONS.

In this division of the directory appear the names of those national and international organizations which have one or more affiliated local unions in the United States. The name of the union is first given, followed by the name and address of the general secretary or other officer acting as correspondent.

Organizations which are affiliated with the American Federation of Labor are

indicated by an asterisk (*).

Organizations which have no affiliated local unions or councils in Massachusetts

are indicated by a dagger (†).

American Federation of Labor. William Green, Pres.; Frank Morrison, S. T., A. F. of L. Bldg., Ninth St. and Massachusetts Ave., N. W., Washington, D. C.; Martin F. Ryan, Treas., 400 Carmen's Bldg., Kansas City, Mo.

STATE AND DISTRICT COUNCILS. II.

In the following presentation appear the names of organizations composed of delegates from local trade unions within a particular trade or group of trades, or a definite district not confined to a single locality. Delegate organizations which are strictly local bodies are included in Section III, under their respective municipalities. For convenience the various Railway Adjustment, Protective, and Grievance Committees have been separately grouped at the end of this division of the Directory.

The following facts are given for each organization: name; business office (if any) and telephone number; time and place of next convention, conference, or meeting; names and addresses of the president, secretary (or other authorized correspondent), and business agent (if any). When no address is given for an officer named, he may be

addressed at the business office or place of meeting.

American Federation of Labor. (See Federation of Labor, Massachusetts State.)

Bakers Unions, New England Conference of. Business office, 18 Center St., Danvers, Tel. 818-R; meet 2d Sun. in Jan. and July at 11.00 A.M.; Wells Memorial Bldg., 987 Washington St., Boston; Henry A. Girard, Pres., Manchester, N. H.; Robert E. Hart, R. S. and B. A.

Barbers, Massachusetts State Association of Journeymen. Business office, 21 Sanford St., Springfield, Tel. 79238; Frank Rogers, Pres., 50A Rockaway St., Lynn; H. C. Niebuhr, S. T., 280 Commonwealth Ave., Springfield.

Bartenders, State Council. (See Hotel and Restaurant Employees.)

III. CENTRAL LABOR UNIONS AND LABOR COUNCILS.

The following list includes those local delegate organizations, such as central labor unions and local councils, which are purely representative bodies composed of delegates from their respective affiliated local unions. Delegate organizations which are not strictly local bodies are included in Section II, under their occupational names.

The following facts are given for each organization: name; time and place of meeting; business office or headquarters (where different from place of meeting) and telephone number; name and address of the president, secretary (or other authorized correspondent), and business agent (if any). When no address is given for an officer named, he may be addressed at the business office or place of meeting.

IV. LOCAL TRADE UNIONS.

The names of the local trade unions appear in the following presentation, grouped for ready reference by trade and occupational headings, under the respective municipalities in which they are located.

The following facts are given for each union: name; time and place of meeting (when hour of meeting is not given, union meets at about 8.00 P.M. on week days and 2.00 P.M. on Sundays); name and address of secretary, business agent, or other authorized correspondent. When name of any official is given without address, he may be addressed at place of meeting.

All but a few of the local unions are affiliated with national or international bodies.

these few being entirely independent of any other labor organizations.

V. STATISTICS OF LABOR ORGANIZATIONS, 1932 TO 1936.

Introductory.

The statistical data here presented have reference to the number and membership of labor organizations which were in existence in Massachusetts at the close of each of the years 1932 to 1936, inclusive. The questionnaire sent each January to officials of labor unions for the purpose of securing information for use in the directory, issued annually, includes an inquiry calling for the number of members of each local organization, by sex, as of December 31 of the previous year. For the most part, the information requested was secured by mail, but in those instances where the local officials failed to return the questionnaires, statistical investigators of the Department obtained the information from some official source.

Details with respect to individual unions are held strictly confidential, and are used only in the compilation of totals. Accordingly, in order not to disclose the membership of any organization reporting, the statistics presented in no case relate to less

than five organizations in any group.

Statistics of labor organizations in Massachusetts were collected annually, beginning with the year 1908, by the former Bureau of Statistics, and since 1920, by the Division of Statistics of the Massachusetts Department of Labor and Industries. Summaries of the returns have been preserved in the files of the Department. The tabulations do not include unions of letter carriers, post office clerks, or railway mail clerks.

1. Comparison by Industries and Trades.

The number of local unions in Massachusetts at the close of 1936 was 1,230, which was ten more than the number existing at the close of 1935. Most of the new unions which were organized in 1936 replaced unions which had previously been in existence. The "Committee for Industrial Organization" had not reached the peak of its activities in 1936, and many unions were still in the process of organization at the close of that year. In the tabulation of membership, only those unions actually organized and chartered were considered.

The membership of local unions varied considerably during the five-year period under discussion. The minimum number during the period was 155,342 in 1932, there was a marked gain in 1933, a further gain to 246,411 in 1934, a large decrease in 1935, and a small gain in 1936, so that the 1936 membership (231,710) was almost the same as that for the year 1933 (231,591). The male membership was at its maximum in 1934 with 195,293, and female membership reached its peak the same year with 51,118.

An endeavor has been made to classify each local organization with that industry or group of trades with which the majority of its members are most closely identified. Based on the number of local unions, the leading organized industries at the close of 1936 were as follows: building trades, 305; transportation (steam and electric), 206; textile industry, 88; boot and shoe industry, 70; printing and allied trades, 60; and metal and machinery trades, 56.

Based on the membership of local unions, the boot and shoe industry ranked first in 1936 with 37,017 members, followed in order by the textile industry, 35,018; transportation (steam and electric), 26,868; building trades, 25,694; metal machinery trades,

16,880; and printing and allied trades, 7,439.

As a result of the establishment of industrial "codes" in 1933 the labor union officials were very active in organizing locals in many industries which previously had never been organized. Due to these activities the textile industry had by far its greatest membership in 1934, and a continuance of activity in the electrical machinery and radio industry resulted in the metal and machinery trades showing their maximum membership at the close of 1936. The organization of "vertical" unions in fields never heretofore organized resulted in a greatly increased membership in the "all other industries" group. The largest of these gains included gas and electric workers, rubber workers, and telegraphers.

Boot and Shoe Industry. The number of unions in existence at the close of the year 1936 was 70, one more than at the close of 1935; the membership at the close of 1936 was 37,017, of whom 22,825 were males and 14,192 were females. In each instance the figures were less than at the close of 1935.

Textile Industry. The number of unions in the textile industry was 88 at the close of 1936, a net decrease of eleven from the previous year; the total membership, however, showed a slight gain in 1936 (35,018 members as compared with 34,323 in 1935). The proportion of membership by sex was about as before (males, about 60 per cent; females, about 40 per cent).

Building Trades. There were 305 building trades unions in existence at the close of 1936, or a net loss of four during the year. The membership at the close of 1936 was 25,694, or slightly greater than at the close of 1935.

Transportation (Steam and Electric). The number of transportation unions increased from 193 at the close of 1935 to 206 at the close of 1936, and the membership (which is composed largely of males) increased slightly during that period to 26,868 at the close of 1936.

Metal and Machinery Trades. The number of metal and machinery trades unions in existence at the close of 1936 was 56, showing no change from the previous year. There were, however, marked gains in membership so that at the close of 1936 these unions had a total of 16,880 members as compared with 11,518 in 1935. Large gains occurred in both male and female membership as the membership of the newer type of unions includes all plant employees and not simply certain crafts.

Printing and Allied Trades. The number of printing and allied trades unions was 60 at the close of 1936, showing little change from previous years. The membership at the close of 1936 was 7,439, which was greater than in 1935 but not quite so great as in 1934.

All Other Industries. The number of unions in the miscellaneous industries and trades increased from 436 at the close of 1935 to 445 at the close of 1936. Total membership increased from 74,300 at the close of 1935 to 82,794 at the close of 1936. As already stated, there were a number of important unions in existence in 1935 in industries and trades which had not previously been organized, and these unions increased their membership still more in 1936.

DISTRIBUTION BY OCCUPATIONAL GROUPS.

It is the policy of the American Federation of Labor and affiliated organizations to organize members of a single craft or trade, or employees in closely related occupations. Where there is not a sufficiently large number of wage-earners in a single craft to form a distinct local for that craft, the Federation charters "federal labor unions" which include those not eligible for admission to any of the existing organizations. These are usually replaced later by, or members are transferred to, other craft organizations. As a result of the NRA "codes" a new policy came into being, by which all workers in a plant were organized in a single union designated as a "plant" union, without regard to the class of work performed by them. This policy of organization was followed by the "Committee on Industrial Organization" after the suspension of its members from the American Federation of Labor; this Committee acted in the capacity of a national labor organization under the original chairman.

In Table 2 data are presented for each of the five years, 1932-1936, inclusive, for each occupational group comprising at least 1,000 members during the greater part of the period. For the boot and shoe industry and the textile industry it was not possible to show memberships by occupations because of the prevalence of "mixed" unions comprising workers of all types. The occupational groups, each comprising at least 3,500 members at the close of 1936, were the following: garment workers, 13,786; teamsters, chauffeurs, and helpers, 9,962; street and electric railway employees, 8,613; carpenters, 8,478; leather tannery workers, 8,214; municipal and state employees, 5,943; musicians, 5,134; telephone operators and workers, 4,615; railway clerks, 4,047; hotel and restaurant employees, 3,909; government employees, 3,869; painters, decorators, and paperhangers, 3,785; and hod carriers and building laborers, 3,502. The outstanding increase in membership in any occupational group during the five-year period occurred in the garment workers group, which increased their membership from 5,305 at the close of 1932 to 13,786 at the close of 1936.

DISTRIBUTION OF LOCAL UNIONS BY MUNICIPALITIES.

The principal field of activity of that type of labor organization known as a "local union" is the city or town in which a large majority of the members are employed, and in which the headquarters are located. Frequently a local union in a city or town is granted jurisdiction over one or more cities or towns adjacent thereto. The jurisdiction of certain types of railroad unions oftentimes extends over an entire system, and their membership thus includes some employees from distant points on the system represented in a local union, classified under that city or town in which it has its head-quarters. In the city of Boston the total membership of organizations classified under quarters. In the city of Boston the total membership of organizations classified under Boston usually is much greater than the number of organized wage-earners who reside there, but the majority of whom are employed in Boston. The work entailed in ascertaining the residence of each member of a union would hardly be justified by the results obtained.

¹ Because of the prevalence of "mixed" unions it is not possible to present data on an occupational basis for unions in the boot and shoe industry or the textile industry.

Data are presented in Table 3 showing the number and membership of local unions in Massachusetts at the close of each of the years 1932–1936, inclusive, classified by municipalities in which there were five or more unions and which had a membership of 500 or more in 1936.

Boston far outranked all other municipalities in the state with respect to the number of local unions and their membership. Of the 1,230 unions in Massachusetts, 285, or 23.2 per cent, had their headquarters in Boston in 1936. The aggregate membership was 76,562, or 33.0 per cent of the total membership (231,710) of all local unions in the State in that year.

In ten municipalities the number of organized wage-earners exceeded 7,500 in 1936. These ten, arranged in order of number of members, were: Boston (76,562), Brockton (14,257), Springfield (13,942), Lynn (13,170), Fall River (11,120), Haverhill (9,842), Lowell (9,268), Worcester (8,370), New Bedford (8,258), and Lawrence (8,108). The total membership of the unions in these ten municipalities was 172,897, or 74.6 per cent of the aggregate membership.

¹ The number and membership of the local unions are tabulated under the respective municipalities in which the headquarters of the unions are located. In only a few cases is the membership confined to the municipality in which the local union has its headquarters.

² Data cannot be shown without disclosing the membership of individual organizations. Number and membership of unions in these cities is therefore included in the "All others" group in the years 1932–1935.

^{*}General Note. — Should the information desired for any given occupation not be found in the table first consulted, it is suggested that reference be made to other tables in which it might properly belong, as occupations are grouped under the industry or trade to which they directly relate. For example, "Carpenters" will be found under the Building Trades (Table 1), Municipal Service (Table 14), as well as in other tables.

Pt. II.

Time Rates of Wages and Hours of Labor in Massachusetts, 1937

INTRODUCTION

This report, showing rates effective July 1, 1937 (in all except theatrical employment, in which the beginning of the fall contract season has for many years been designated as the reporting date) constitutes the twenty-eighth in a series of Labor

Bulletins of this nature.

In the major portion of the report (Section "A. Industries and Trades") appear those data which relate to basic time rates and conditions of employment affecting members of labor organizations in Massachusetts as reported to the Department, on a prescribed form, by officials of the local unions. The information so secured is occasionally supplemented by data from other official sources. In the remainder of the report are presented similar data concerning municipal employment (Section B), gas and electric service, street and electric railway service and passenger bus service, and telephone service (Section C). The rates herein recorded are comparable with those in prior reports of a similar nature, and, together with such rates, are indicative of the trend of wages.

The annual collection of these data relating to time rates of wages and hours of labor in Massachusetts is an important function of the Division of Statistics. With minor exceptions, rates or schedules presented in this report became effective as a result of verbal or written agreements between employers and organized employees. Notations relative to any known changes which occur after the reporting date appear as footnotes, but such changes are not frequent, as it is the usual practice to

renew or change agreements in the late winter or in the spring months.

In some industries, particularly the boot and shoe industry, the prevailing method of wage payments is on the basis of piece work prices. Hourly and weekly rates shown in this publication for the textile industry are those which apply when workers are engaged on a time basis at the operations named, many of which are

ordinarily considered as being on a piece price basis.

The rates of wages as tabulated in this bulletin should not be confounded with actual earnings. The former are the rates agreed upon for a specified period of time, viz., an hour, day, or week; the latter result from the number of hours worked at these specified rates. An increase in earnings is not effected simply by an increase in rates, as a scarcity or abundance of work enters largely into the matter

of earnings.

The hours of labor per day and per week have become fairly well standardized, with three schedules most prevalent, namely: a 5-day 40-hour week, a 5½-day 44-hour week, and a 5½-day 48-hour week. In the last instance the working schedules call for either 8½ or 8½ hours per day during each of the first five days, the remaining hours being worked Saturday morning. Schedules calling for six straight 8-hour days now relate almost wholly to engineers and firemen, watchmen, etc. Because of the standardization of hourly and weekly schedules generally, the weekly hours of labor only are given in this report in all except a few tables. A 40-hour week was the one most generally in effect throughout the different industries.

The method of presentation adopted is fundamentally the same for all industries, but in certain tables, as in theatrical employment, the box headings have been changed in order to more clearly present the particular type of employment being considered. The basic units of payment for all occupations in a specified industry

¹ The first of this series of reports was issued in 1910 by the Massachusetts Bureau of Statistics as Part I of the Forty-first Annual Report on the Statistics of Labor. Subsequent reports were issued as Labor Bulletins by that Bureau and by the Department of Labor and Industries, to which department were transferred, on December 1, 1919, certain of the functions of the former Bureau of Statistics. The Labor Bulletins were as follows: 1911, No. 91; 1912, No. 96; 1913, No. 97; 1914, No. 107; 1915, Nos. 114 and 115; 1916, No. 120; 1917, No. 124; 1918, No. 128; 1919, No. 131; 1920, No. 134; 1921, No. 187; 1922, No. 138; 1923, No. 141; 1924, No. 144; 1925, No. 147; 1926, No. 150; 1927, No. 153; 1928, No. 155; 1929, No. 158; 1930, No. 161; 1931, No. 164; 1932, No. 166; 1933, No. 168; 1934, No. 170; 1935, No. 173; 1936, No. 175.

or trade are usually identical, that is, by the hour, day, or week. All relevant information has been shown in tabular form so far as possible, but many of the provisions of employment cannot thus be indicated, and are accordingly briefly summarized in explanatory footnotes accompanying each table.

When overtime work is necessary, it is an almost universal practice to pay the regular straight-time rate plus a given portion of that rate. These "overtime rates" are generally shown in symbolic form, as follows: 1T=straight time; 11/4T=time

and one-quarter; $1\frac{1}{2}T = \text{time and one-half}$; and 2T = double time.

Saturday afternoon, 2 T.

¹ On repair and maintenance work, 44 hours per week.

2 Boston rates and conditions apply in eastern Massachusetts including Worcester County; Springfield rates and conditions apply in four counties in western Massachusetts.

3 Rate per week.

4 Broken time rate, \$1.57½ per hour.

5 Broken time rate, \$1.57½ per hour, with a minimum of a day's pay.

6 When not required to get up steam each morning they must, when necessary, work four hours on Saturday morning for same weekly wage.

4 Rates given apply chiefly to metal and wire, other lathing being done mostly by piece work.

5 Saturday afternoon 2 T

11 Same rates apply in Rockport.

Rate per week.

 ¹ From April 1 to June 30, work four hours on Saturday, 44 hours per week.
 ² From November 15 to March 15, no work on Saturday, 40 hours a week; 2 T on Saturday if required to

From November 15 to March 16, no work on Saturday, As about 44 hours a week; 1½ T after 44 hours.

From March 1 to June 1, work an additional four hours on Saturday, 44 hours a week; 1½ T after 44 hours.

From October 1 to April 1, no work on Saturday, 40 hours a week.

From March 1 to April 1, work an additional four hours on Saturday, 44 hours a week; 2 T after 44 hours.

Receive 50 cents a day over rate of \$1.00 an hour paid for inside work.

Rates shown are for day work only; cutting is usually on a piece-work basis.

Lower rate in shops of stone contractors; higher rate on jobs not under stone contractors.

Engineers with boiler or boiler and compressor to be paid above the minimum rate in accordance with the size of the plant and amount of extra labor that it is necessary for them to perform.

¹ Minimum.

² Weekly rate is based on 48-hour schedule in effect during four winter months. During other months are paid by the hour and receive graded extra compensation per day so that if full schedule of hours is worked (40 or 44, depending on month) receive full weekly rate.

³ Receive 85 cents per hour for first hour overtime, and then 1½ T.

⁴ Paid \$1.00 per week for each additional horse.

⁵ Also receive certain commissions on sales of butter and ice cream.

⁶ All men working Saturday nights shall receive \$8.53 for 8 hours work.

³ Rate per day of 8 hours or night of 7 hours.

⁵ Three dollars expenses allowed.

¹ Rates effective Labor Day, or at beginning of fall contract season.

² Operators are usually engaged on the basis of two and one-half or three hours per performance — five or six hours a day. Rates quoted are paid operators for full schedule of hours. All time over 40 hours per week is usually worked by spare operators.

³ Sundays, \$8.00 for four hours or less; overtime, \$2.70.

⁴ Same rates apply also in Chicopee Falls, Indian Orchard, Ludlow, Palmer, Three Rivers, Ware, and West-

Figure 13 Higher rate applies to Sunday overtime.

Same rates apply in Clinton and Leominster.

Lower rate, two performances a day; higher rate continuous performances, three-man shift. 8 Rates vary according to individual agreements.

¹ See note 2, page 41.

² Overtime pro rata. ³ Rates effective Labor Day, or at beginning of fall contract season.

4 Rates for fourteen performances weekly include two shows on Sunday; otherwise Sunday engagements are on a special basis.

are on a special basis.

§ Rates quoted are the minimum and when substituting is permitted. When the number of musicians is specified by agreement, rates per musician and leader increase as number employed decreases.

§ A single performance usually covers 2¾ or 3 hours; matinee and evening performances, usually 5½ or 6 hours in all, including a one-half hour intermission. Six hours constitute a day's work in picture theatres.

8 Not over 30 hours, including rehearsals.

Rates paid in theatres not shown vary according to individual contracts, based on class of performance playing time, etc.

A minimum rate of \$100 per week has been established by the International Union for carpenters, electricians, and propertymen traveling with road shows; \$92.50 per week for all others. One day's work, one-sixth of weekly scale. Rates shown in table for heads of departments apply to carpenters, electricians, and

propertymen who are regularly employed.

Rates effective Labor Day, or at beginning of fall contract season.

Rates in "Special Performance" column apply when employees are engaged for performances outside of the regular week-day schedule, for additional Sunday performances, for midnight shows, or for other than

regular attractions.

Rate per day on a three-show basis.

⁵ Under this heading are grouped theatres playing first-class vaudeville, with motion pictures. ⁶ Two crews of six men each; one crew works from 10.00 A.M. to 5.00 P.M., and one works from 5.00 P.M. until drop of curtain of last show.

Lower rate for vaudeville dressing, six days of three performances or less; higher rate for seven days, or for four performances per day for six days.

9 Opera dressing. 10 Rate per hour.

12 Rate per day.

Theatres operating under a straight picture policy do not include vitaphone or other mechanical pictures. Electricians are usually employed 6 days per week at broken time rate. When vaudeville acts are given in conjunction with pictures, the vaudeville scale shall prevail, and the amount of help shall be required and paid for at vaudeville rates.

[&]quot;Rates vary according to service in theatre; higher rate for dressing two principals.

¹Opening and closing hours of barber shops are generally agreed upon locally, and barbers receive a fixed weekly rate plus a commission based on weekly receipts per chair. The commission usually consists of one half the receipts in excess of an amount named.

If the receipts in excess of an amount named.

2 Minimum rate per week.

3 No fixed weekly rate; men receive 75 per cent of what they take in.

4 No fixed weekly rate; men receive 60 per cent of what they take in.

5 Minimum rate per week; men receive 70 per cent of what they take in.

6 No fixed weekly rate; men receive 65 per cent of what they take in.

7 No fixed weekly rate; men receive 70 per cent of what they take in.

8 If men take in \$35 they get \$25 and 50 per cent over \$35.

9 The bonus usually paid only when receipts exceed \$35 or \$40 a week, depending upon the shop.

B. MUNICIPAL SERVICE

As in previous years, a questionnaire was sent to the mayors of cities and to the chairmen of the boards of selectmen of the towns in Massachusetts which have a population of over 10,000 according to the 1935 census. This questionnaire requests information regarding the rates of wages paid to "laborers, workmen, and mechanics" in municipal service as of July 1, 1937. Returns were received and are here presented for 75 municipalities (39 cities and 36 towns).

There are presented in the table the basic rates in effect in 1937 and notations of any wage cuts or plans of contributions which have been reported. In comparing rates for definite occupations in different cities care should be taken to

ascertain the actual earnings.

The data in the table which follows are arranged alphabetically by municipalities and by occupations thereunder. Only those occupations are considered which come within the provisions of the General Laws of Massachusetts with reference to "laborers, workmen, and mechanics." A number of municipalities find it advisable to let out on contract certain types of construction and other work which they are either not equipped to perform or which can be performed more economically under such arrangements. The rates paid those on such contract work do not appear in this tabulation.

In each municipality, data with reference to the hours of labor appear in brief form after the tabulation of the established rates. Notations are also made regard-

ing any special conditions of employment.

The maximum hours of labor in municipal employment are prescribed by the General Laws of Massachusetts (chapter one hundred and forty-nine). These laws, quotations from which appear below, become operative in whole or in part when all or certain sections thereof are accepted by the municipalities. No statement describing the action taken in this respect by the individual municipalities is here presented.

"The service of all laborers, workmen and mechanics ('... engineers shall be regarded as mechanics ...') ... is hereby restricted to eight hours in any one

day . . . and to forty-eight hours in any one week.

"No officer of . . . any such town, no such contractor or sub-contractor or other person whose duty it is to employ, direct or control the service of such laborers, workmen or mechanics shall require or permit any such laborer, workman or mechanic to work more than eight hours in any one day, . . . or more than forty-eight hours in any one week, except in cases of extraordinary emergency.

"It shall not be a violation of section thirty or thirty-one (above extracts are quoted from these sections) if, in the event of a Saturday half-holiday being given to a laborer, workman or mechanic, his hours of labor upon other working days are increased sufficiently to make a total of forty-eight hours for his week's work.

"In any town not subject to section thirty or thirty-one nine hours shall constitute a day's work for all laborers, workmen and mechanics employed by or on

behalf of such town."

In the matter of wage payments and overtime, there are several generally accepted methods of payments, as follows:

Those persons employed on an hourly basis receive pay for the actual number

of hours worked.

Employees on a daily basis are paid a definite wage for each day worked, whether a full week-day or a Saturday half-holiday, but, in the case of a 44-hour weekly schedule calling for only 4 hours' employment on Saturday, the full daily wage is usually not paid for work on Saturday morning unless the employee shall have worked a given number of hours (optional with the municipality) during the first five days of the week. Employees working the full schedule therefore receive for a full week's services six times the daily wage.

In the event that the schedule calls for 48 hours' employment during the week, special daily schedules may be arranged to provide for a Saturday half-holiday without lessening the total number of hours of service required to be performed per week (see third extract quoted in the section just preceding). A schedule quite commonly adopted calls for 8½ hours for each of the first five days of the week and 4½ hours on Saturdays. The daily wage for each day worked is one-sixth of the weekly wage for 48 hours' employment. The rearrangement of the

schedule of hours to provide for a Saturday half-holiday does not affect the daily wage payable unless the employee shall have worked insufficient hours to entitle him to a full week's pay. If he has worked only part time, he receives for each hour worked one-eighth of the established daily wage.

Those employed on a weekly basis receive a stipulated sum for a given number of hours of service per week. When less than a full week is worked, a propor-

tionate part of the weekly wage is paid.

When overtime is necessary "... in cases of extraordinary emergency," employees are paid on a special basis under regulations adopted by the governing bodies of the municipalities or under rulings of the departmental heads. If overtime should be necessary on a continuing job, not classified as an emergency, the working time of those so engaged is arranged so that the maximum hours for a week's work may not be exceeded and the regular weekly earnings are not increased because of such work. In certain classes of service a limited number of persons are employed on Sunday, and are either paid on a special basis or else the schedule of hours is arranged so that not more than 48 hours are worked in any seven days.

In the case of holidays, special rulings are made by the municipalities. Permanent employees are usually granted holidays with pay. Those actually employed on such days are paid on a special basis or allowed time off in lieu of overtime pay.

C. PUBLIC UTILITIES.

Introductory Note. The data set forth in connection with Public Utilities are presented in four sections. The information in Section I has reference to those occupations which are peculiar to the operation and maintenance of street railway lines; in Section II are presented data with reference to passenger bus lines, which are now an important factor in transportation; in Section III are given data with respect to gas and electric companies; and in Section IV, telephone service.

T

STREET AND ELECTRIC RAILWAY SERVICE.

The employees of street and electric railway companies are divided, broadly, into two classes — those in the passenger service, or "blue uniform" men, and those employed in what may properly be known as construction, maintenance, and repair service. Rates of wages, hours of labor, and other conditions of employment applicable to such men are, in most instances, the result of formal agreement between the street railway line and labor organizations.

The employment of uniformed men is governed by schedules drawn up by officials of the companies. These schedules provide that a certain number of runs or trips shall be made daily, over stated routes, taking into consideration the morning and evening rush hour "peak" loads. Seniority governs the selection of runs and the employment of the men. The daily and weekly hours of labor of other

than uniformed men vary with the nature of the work performed.

The information with reference to operators of passenger busses maintained by street and electric railway companies has been enlarged upon because of the growing importance of this means of transportation.

II.

Passenger Bus Service.

During recent years there has been a rapid increase in automobile bus service rendered in conjunction with or superseding street railway lines, and there are also a number of bus lines directly competing with certain railroad branch and through lines. In addition, passenger busses operate over routes not heretofore traversed

by any of the former means of transportation.

As of July 1, 1937, such companies as operated in Massachusetts were requested to furnish this office with information concerning the rates of pay and scheduled hours of labor of their employees.³ The returns were sufficiently comprehensive to enable the Department to present in Table 16 data for thirty-three passenger bus companies which operate on definite schedules over stated routes. Of the thirty-three, nine were formerly street and electric railways which now operate busses exclusively. No information is presented for the "tourist" or "sight-seeing" bus companies.

Where two or more rates are given, the lowest rate represents the minimum, and the highest the maximum for the occupation named.
No regular schedule of hours.

Rates for bus operators employed by street and electric railways which operate electric cars are presented in Table 15 under the "Passenger Service" section.

III.

GAS AND ELECTRIC SERVICE.

During the past year agreements have been reached between certain of the gas and electric companies and union employees, and as a result the rates of wages set forth in this section of the report were established and were in effect as of July 1, 1937.

² Rates and come apply in Haverhill, Clinton, Gardner, Athol, and Winchendon.

³ No exertime colleged.

TELEPHONE SERVICE.

The data presented in this section were furnished by the New England Telephone and Telegraph Company and were in effect as of July 1, 1937. The rates shown apply to switchboard operators and to clerks in the exchanges within the jurisdiction of the Boston headquarters. Care should be used in comparing these rates with rates in private employment because of the fact that much of the work is of a nature peculiar to telephone service.

The rates appearing on the schedules become effective upon completion of the specified periods of actual length of service. The hours of labor to which the weekly rates of wages apply range from 30 to 40 hours per week, varying according to the nature of the tour assigned. In comparison with those on day assignments, Operators, Junior Supervisors and Supervisors assigned to forenoon-evening, afternoon-evening, night first half, and all night tricks receive a differential either in a reduced number of hours of work, or addi-

tional compensation, or both, depending upon the type of assignment.

These rates were made effective on May 16, 1937, for senior operators who had 13 years' service or more on that date, or were in the group having between 12 and 13 years' service on August 30, 1936.

Junior Supervisors are paid at a rate of \$1.00 more per week than operators or senior operators of correspond-

ing service Chief Clerks are not paid in accordance with a definite wage schedule but their rates of pay are at least

^{\$1.00} more per week than the rates of Supervisors of corresponding service. Senior Clerks are paid at a rate of \$2.00 more per week than operators or senior operators of corresponding service. Clerks are paid at a rate of \$1.00 more per week than operators or senior operators of corresponding service.
